Module 3 Exercise: Bar Plots - with Advanced Features

1. R code used when creating the bar plot

```
a<-read.csv("bookpages.csv")  
bp<-barplot(a$Pages, names.arg=a$Title, xlab="Titles", ylab="Pages", main="Book  
Pages", col=rainbow(6), cex.names=0.50, ylim=c(0,600))  
text(x=bp, y=a$Pages+10, label=a$Pages, col="Red")
```

2. Screenshot of the bar plot created
